

## COMMERCIAL LIGHTING PRICE LIST

# JAQUAR LIGHTING

Jaquar Lighting follows in the footsteps of Jaquar Group by ensuring that every lighting product reflects Jaquar's impeccable record of superlative quality and painstaking attention to the minute detail.

Whether it is LED Bulbs, Tubelights, Chandeliers, Landscape Lighting or Track Lights, Jaquar Lighting's LED solutions are created with a commitment to Energy Efficiency, Quality and Durability, Aesthetic Design and Customer Service.

It is a commitment powered by Jaquar Lighting's impressive list of capabilities:

- Its own NABL Accredited Laboratory for in-house testing
- All luminaires tested in accordance with latest standards for LM
- A wide range of testing equipments for thorough quality check of the products
- Well experienced in-house lighting design team located at HO and at Regional Levels
- Professional lighting design software to match global standards
- Compliance with the most stringent quality standards
- Experience of doing some light visibility and large hospitality projects
- Exclusive team to provide unmatched facade lighting solutions

Jaquar Lighting's primary focus is to sustain a world class design standard, achieve the best quality in its products and offer cutting edge services apart from regular innovation and energy efficient solutions.

## COMMERCIAL LIGHTING

Jaquar Lighting pushes the boundaries of commercial lighting to provide you with some of the most advanced, high performance, energy-saving LED lighting systems for the workplace. There is a wide variety of products to suit every application and light every area of any kind of commercial establishment, from workstations to conference rooms, reception areas to cabins, and small showrooms to large retail chains.

Dia: ø40mm H: 207mm

## IP RATING

The 'IP' Code is a standard referred to as International Protection Marking (also commonly interpreted as Ingress Protection Marking) - it rates the inherent degree of 'sealing protection' provided by the mechanical casing/electrical enclosure of a device against intrusion from foreign bodies (e.g. - fingers, tools, wires, insects, dust etc.) and forms of water exposure (e.g. - condensation, droplets, direct spray, full submersion etc.)

IP ratings are a well recognised benchmark (IEC international standard EN 60529) (British BS EN 60529:1992, European IEC 60509:1989) and are applied to many everyday devices - e.g. electronic/electric consumer goods

### **So what do the numbers mean?**

Each IP code has TWO digits to define its level of protection - an "x" is used as one of the digits if there is only one class of protection. The European Standard EN 60529 outlines the IP ratings as an international classification system for "enclosures for electrical equipment" as follows:

**The first digit** of the IP code indicates the degree that persons are protected against contact with moving parts (other than smooth rotating shafts, etc.) and the degree that equipment is protected against solid foreign bodies intruding into an enclosure.

**The second digit** indicates the degree of protection of the equipment inside the enclosure against the harmful entry of various forms of moisture (e.g. dripping, spraying, submersion, etc.)

## Lighting IP - Rating reference diagram

| IP54 = IP Letter Code _____ IP                                                                                                                                                                                                                                 |                                                                                                                                        |                   |                                                                                                                                           |

| 1                                                                                                                                                                                                                                                              |  Protected against solid objects greater than 50mm    | 1                 |  Protected against dripping water                       |
| 2                                                                                                                                                                                                                                                              |  Protected against solid objects greater than 12mm    | 2                 |  Protected against dripping water when tilted up to 15° |
| 3                                                                                                                                                                                                                                                              |  Protected against solid objects greater than 2.5mm  | 3                 |  Protected against spraying water                      |
| 4                                                                                                                                                                                                                                                              |  Protected against solid objects greater than 1.0mm | 4                 |  Protected against splashing water                    |
| 5                                                                                                                                                                                                                                                              |  Dust protected                                     | 5                 |  Protected against water jets                         |
| 6                                                                                                                                                                                                                                                              |  Dust tight                                         | 6                 |  Protected against heavy seas                         |
| Note: EN 60529 does not specify sealing effectiveness against the following: mechanical damage of the equipment; the risk of explosions, certain types of moisture conditions, e.g. those that are produced by condensation; corrosive vapours; fungus; vermin |                                                                                                                                        | 7                 |  Protected against the effects of immersion           |
|                                                                                                                                                                                                                                                                |                                                                                                                                        | 8                 |  Protected against submersion (see note)              |

### ***Global Headquarters***

Net Zero Energy Building spread over 48,000 sq. mtrs.

Conceived back in 1960, the Jaquar Group has been built on the platform of the highest quality standards, aesthetics and the intent of providing world-class products. Today, the Jaquar Group caters to luxury, premium and value bathroom segments with Artize, Jaquar & Essco brands, respectively, for residential and commercial sectors across the globe.

## Artize

It pays a tribute to the fine traditions of exquisite craftsmanship and precision where design, technology and talent combine to deliver a masterpiece. Artize products are crafted for luxurious bath spaces. Perfect harmony is the very essence of Artize- together as coordinates or even as individual pieces. Artize's exquisite craftsmanship is so stunning that it can inspire the design principles of not just your bath spaces but of your entire living spaces.

## Jaquar

A leading global super brand known for its excellence in innovation and technology. The highest build standards combine with the most beautifully designed aesthetics to provide world-class products for tough conditions. With a superb blend of ergonomic shapes, contemporary styles and meticulous finish, Jaquar continues to enthrall millions of hearts across the world with its wide range of concepts and products.

## Essco

For over five decades now, Essco, the bath fittings brand, has been supporting affordable and sustainable housing in India. Essco is a value for money bath brand from the Jaquar Group, which is the leader in Complete Bathing Solutions. Essco, a Pan India brand, added a whole new chapter in the bath fittings industry by ushering in the era of the organised bath market. Essco set out with an obsession for good quality products at affordable pricing, one that was unheard of in the corridors of bath fittings manufacturers then. With its 10 years of warranty and impeccable customer service, Essco is standing tall in the Indian bath fittings Industry since 1960 and touching more hearts every year.
